

03 September 2021

Hello,

**Keeping you informed as we supply the North West with quality drinking water. Whittingham Lane, Broughton Road Closure**

We are writing to let you know that we are currently installing a new 10Km pipeline and our team are working on Whittingham Lane, Broughton. You may have teaching staff and parents who use this route during the week. You might like to be aware of the road closure and diversion as you may wish to add on a few extra minutes to your journey. We appreciate that roadworks are never welcome, and would like to thank you for your patience whilst we undertake this necessary work.

**How does this section of work affect me?**

**School busses**

We are working with Lancashire County Council school bus services and are notifying them regarding the road closure and diversion.

**Whittingham Lane/Langley Lane Temporary Traffic Lights**

- We have traffic lights in place along Whittingham Lane. At the end of September until early October we will be working across the junction of Langley Lane. The lane will remain open to all traffic as only one lane will be closed at a time. Pudding Pie Nook Lane is accessible from Broughton direction and will be included in the temporary traffic light system.

**Whittingham Lane: Road closure**

There are sections of our pipeline that cross Whittingham Lane at key points, where we are unable to complete our work using temporary traffic lights.

- From Monday 13 September until 31 October we will be working along Whittingham Lane from the junction of Langley Lane towards Short Lane. This section of road will be closed to all traffic. Advance road closure warning signs will be situated on the road the week before. During this period of work a diversion route will be in place with clearly signed directions. A copy of this is on the reverse page.
- To ensure we complete the work as quickly as possible our working hours will be Monday to Friday 07:30am-18:00. Weekend working hours will be Saturday 08:00am-16:00 and Sunday 09:00am-17:00pm.

**Keeping in touch with us**

If you have any questions you can always call us on 0345 672 3723 quoting project reference **80062958**. We'll be happy to help.

Yours faithfully,

Customer Services
